

CAPABILITY STATEMENT

COMPANY OVERVIEW

Aeris Communication Services LLC is a Minority-Owned, Small Disadvantaged Business (SDB), and Airport Concession Disadvantaged Business Enterprise (ACDBE) specializing in structured cabling, low-voltage systems, and custom business solutions. With over a decade of experience, we deliver reliable network infrastructure, CCTV surveillance, audio/visual installations, access control systems, fiber optics, software integration, business process reengineering, and technical project management. Serving commercial, municipal, and government clients, we provide scalable and compliant solutions that enhance operational efficiency, regulatory adherence, and long-term value. Our team's expertise ensures seamless project execution, whether upgrading a single site or managing multi-location deployments.

CORE COMPETENCIES

- **Structured Cabling & Low Voltage:** Design, installation, and maintenance of network cabling, fiber optics, and low-voltage systems for commercial and government clients.
- **CCTV & Security:** Installation, calibration, and monitoring of CCTV systems to ensure security.
- **Audio/Visual Systems:** AV system design, integration, and installation for conference rooms, auditoriums, and public spaces.
- **Access Control:** Installation and management of access control systems to regulate permissions.
- **Business Process Reengineering:** Streamlining operations and workflows to improve efficiency and compliance.
- **Project Management:** Technical and operational management to ensure timely delivery, budget adherence, and quality.
- **Software Development & Integration:** Custom software solutions and integration to improve operations.
